APC 1, APC 3, APC 4, APC 6 LIVING SETTINGS

APC 1

APC 6

APC6 is a left/right invisible cabinet hanger with 2 semi-circular pins Ø15 mm especially conceived for automatic assembly.

APC6 grants high performances even without its fixing on the top panel. It can be installed on cabinets with side panels of minimum 16 mm and with a minimum sanitary gap of 15 mm.

APC6 allows a vertical adjustment up to 18 mm and an in-depth adjustment of maximum 31 mm. The adjustments can be carried out from the inside of the cabinet by using a standard PZ2 screwdriver.

Also featured in the APC family are 1 type of wall plate and 2 types of wall bars made of very thick zinc-coated steel and hardened by punched impressions. Wall bars and wall plates feature oval holes which facilitate the correct positioning and give possibility to carry out the horizontal adjustment. Also available 2 different cover caps: one round version for Ø20 mm hole and one square version for double Ø12 mm holes.

FEATURES AND BENEFITS

UNI EN 15939:2014 - 65 Kg per piece

Certificates available on request.

COVER CAP INSERTING

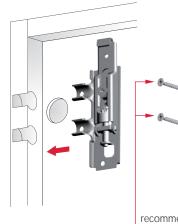

INSTALLATION UNDER THE CABINET TOP

LOADING CAPACITY: 65 KG PER PIECE from internal tests.

WIDE ADJUSTMENT RANGE: vertical and in-depth adjustments.

INSTALLATION ON THE WALL

AUTOMATIC ASSEMBLY: especially conceived for the automatic installation on the cabinet.

ONE COVER CAP: only one hole is needed to provide access to all adjustments.

countersunk head wood screws Ø3x40 mm

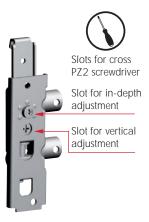

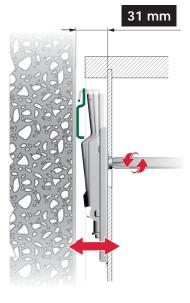

It is the responsibility of the customer:

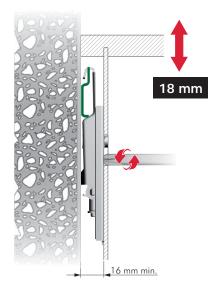

- to ensure that the wall is of a suitable quality to hold the unit fixing in place.
- to use the proper hardware fittings according to the construction of the wall.

For more specific information, please refer to the WARNINGS section at the end of the catalogue.
